Charlie,

From the very launch of our relationship, you have provided our company with excellent follow through service to assist us from web site design to maintenance and enhancements. Even during this competitive economy where web development companies are battling for market share; we are convinced without any hesitation on the personal service and expertise of AWP.

The site has been our best sales tool and generates inquiries locally, nationally and even internationally. We've had numerous orders from the web site that has paid for the web site over and over. We recently had a company that services quarries in Alabama find us from a Google search and ordered over \$50,000 worth of dredge hose from us. Another company from Alaska found us, because of our keyword optimization, and saw we carried petroleum hoses and ordered \$36,000 worth. Resolve Marine, a group specializing in Marine Salvage, Fire & Hazard Response, and Worldwide Wreck Removal, was in the Maryland area for 3 weeks and found our web site doing a local search and has since ordered over \$100,000 worth of products. A company from Lynchburg saw our web site and ordered \$40,000 worth of dredge hose and pipe because Google pulled up our web site for a specific product they were searching for.

We are excited about this latest round of enhancements that allows us the ability to add products and modify the content on the web pages ourselves. We would recommend AWP to anyone interested in building an EFFECTIVE online web presence.

Respectfully,

Christopher O'Brien
